

REFERENCES FOR SECURITY MASTERS

BEKO Europe has been collaborating with **SECURITY MASTERS**, led by **Damian Wróblewski**, since **October 2021**. The decision to establish this partnership was made after conducting an audit of our organization's IT environment, which revealed the necessity of implementing appropriate security measures. Thanks to their professionalism and high-quality services, SECURITY MASTERS has become our strategic IT partner, supporting business development and ensuring the security of our IT infrastructure.

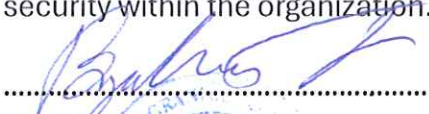

Currently, the entire IT team in BEKO's Polish branch consists of SECURITY MASTERS employees, who manage our IT environment. The company not only supports the Polish branch but also carries out projects across the country, covering IT infrastructure in BEKO-owned factories. Additionally, SECURITY MASTERS actively supports other BEKO branches across Europe. The scope of cooperation includes server and endpoint management, comprehensive IT administration, implementation projects for solutions such as Microsoft 365 – Intune on a scale of several hundred devices, and user support in the Microsoft 365 environment.

From the very beginning of our cooperation, the SECURITY MASTERS team has demonstrated complete professionalism, efficient organization, and expert knowledge, allowing us to successfully implement the necessary changes in our IT environment.

We would like to extend our special thanks to Damian Wróblewski, the owner of SECURITY MASTERS, for his personal commitment to the implementation process, smooth communication, and valuable advice on optimizing our IT processes. Our sincere gratitude also goes to Jakub Rudnik and Patryk Dawidek, who carry out all tasks within our organization with the highest level of diligence and professionalism, ensuring every technical detail is taken care of and that changes are implemented seamlessly.

Thanks to our cooperation with SECURITY MASTERS, our company has gained a modern, secure, and efficient working environment, significantly improving daily operations and enhancing the protection of our company and customer data.

We wholeheartedly recommend SECURITY MASTERS to any organization looking to consciously and effectively manage its IT environment while ensuring the highest level of security within the organization.
